JOBB Checklist:

Initial Conditions:

- ☐ **Computer On**
- ☐ **NinjaTrader On and Connected**

JOBB Trade routine:

- ☐ **1. Ensure following Ninja charts are setup (at a minimum):**
- ☐   **1 Min chart**
- ☐   **1 or 2 Range chart**
- ☐   **"Dummy chart" for strategy programming**
- ☐ **2. Ensure the Output Window is open (Control Center>Tools>Output Window)**
- ☐ **3. Ensure Control Center is displaying the "Strategies" tab and situated near the trading chart (allows for quick disabling of the strategy prior to activation)**
- ☐ **4. Synch internet clock https://jobracketbreakout.net/internet-clock-reset/**
- ☐ **5. Open http://time.is/ to verify internet clock is synchronized**
- ☐ **6. Open http://amplify.talking-forex.com/live.html to hear a live feed of most major reports.**
- ☐   **http://www.bloomberg.com/tv/ for Central Bank news**
- ☐   **http://www.investing.com/economic-calendar/ for oil inventory report results**
- ☐   **http://www.forexfactory.com/calendar.php for all others**
- ☐ **7. Conduct a test run of the software with your intended configuration about 5 min in advance. If everything functions as expected, you are all set.**
- ☐   **If it does not activate, restart your NinjaTrader and retest.**
- ☐ **8. Execute JOBB Trade and exit.**
- ☐ **9. Ensure strategy is disabled**
