

## HIGH IMPACT REPORT ALERT: Tuesday, 2/5/13

<b>ISM Non-Manufacturing PMI</b>				<b>CL 03-13</b>	
<b>10:00 am Eastern / 7:00 am Pacific</b>			<b>Forecast: 55.2</b>		
<b>Avg 1st Peak: 25 ticks (1-3 min after report)</b>		<b>Min: 7 ticks (NOV '12)</b>		<b>Max: 67 ticks (AUG '12)</b>	
<b>Avg 2nd Peak: 48 ticks (8-16 min after report)</b>		<b>Min: 25 ticks (SEP '12)</b>		<b>Max: 72 ticks (AUG '12)</b>	
<b>Avg Reversal: 40 ticks (8-31 min after report)</b>		<b>Min: 20 ticks (APR '12)</b>		<b>Max: 103 ticks (OCT '12)</b>	
<b>Last 6 Reports:</b>	<b>1 : SPK/REV</b>	<b>4 : 2ND PK</b>	<b>1 : DULL</b>	<b>0 : INDECISIVE</b>	
<b>Recommended BracketDistance setting:</b>			<b>5</b>		

Another medium mover with about half the typical yield of the Manufacturing PMI that is very safe, having only had 1 dull occurrence in the last year. It will seek a 2nd peak more often than not. The 1st peak often takes more than 1 candle to hit its max. Reversal usually exceeds the peak. Look for 20-40 ticks on the spike, 30-50 ticks on the 2nd peak, and 20-40 ticks on the reversal.

## HIGH IMPACT REPORT ALERT: Tuesday, 2/5/13

<b>AUS Retail Sales</b>				<b>6A 03-13</b>	
<b>7:30 pm Eastern / 4:30 pm Pacific</b>			<b>Forecast: 0.3%</b>		
<b>Avg 1st Peak: 26 ticks (1-4 min after report)</b>		<b>Min: 8 ticks (APR '12)</b>		<b>Max: 53 ticks (AUG '11)</b>	
<b>Avg 2nd Peak: 39 ticks (12-28 min after report)</b>		<b>Min: 23 ticks (NOV '12)</b>		<b>Max: 62 ticks (AUG '11)</b>	
<b>Avg Reversal: 25 ticks (16-21 min after report)</b>		<b>Min: 13 ticks (NOV '12)</b>		<b>Max: 53 ticks (OCT '11)</b>	
<b>Last 6 Reports:</b>	<b>2 : SPK/REV</b>	<b>3 : 2ND PK</b>	<b>0 : DULL</b>	<b>1 : INDECISIVE</b>	
<b>Recommended BracketDistance setting:</b>			<b>4-5</b>		

Medium Mover report that is consistent. Look for 20-35 ticks on the first peak which can happen after the :01 candle. Occasionally (3 out of last 12 reports) has a second peak for only about 10-20% more ticks than the first peak around 12-28 minutes after the report release. Reversal usually yields 15-30 ticks in 16-21 minutes after the release; however if there is a second peak, look for the reversal to take 35-55 minutes.
