Newer report for JOBB. The last report was indecisive despite having a good disparity between the forecast and actual results. This is a small moving report and often peaks after the first bar. Look for 12-23 ticks on the spike, and 20-35 on the reversal in 12-40 min. This breaks 2 hours into the European trading session, so the volume on the 6E will be fairly high. There is a potential for a 2nd peak, but only 2 occurrences in the last 7, taking over an hour to be realized.
