

## HIGH IMPACT REPORT ALERT: Wednesday, 4/18/12

<b>Crude Oil Inventory</b>		
<b>10:30 am Eastern / 7:30 am Pacific</b>		<b>Forecast: 1.6M</b>
<b>Avg 1st Peak: 42 ticks (1-3 min after report)</b>	<b>Min: 13 ticks (3/28/12)</b>	<b>Max: 93 ticks (4/4/12)</b>
<b>Avg Reversal: 52 ticks (6-14 min after Pk)</b>	<b>Min: 25 ticks (2/23/12)</b>	<b>Max: 84 ticks (4/4/12)</b>

**Use a 10 tick buffer for this trade to avoid a premature fill in the wrong direction.**

Look for 30-50 ticks on the spike, and 40-60 ticks on the reversal. If the initial spike pops for only 15-20 ticks, get out there if possible, because a reversal is likely forthcoming. Does not routinely abide by the laws of supply and demand.
