<b>Recommended BracketDistance setting:</b>			<b>10</b>	

**Trade with caution and ensure you understand the risk. Use a 10 tick buffer for this trade to avoid a premature fill in the wrong direction.**

After a safe April - June timeframe for this report with only one indecisive report, 3 reports in late June and early July were losers, then the last 7 reports were safe and delivered a big yield. Then 4 weeks ago was indecisive again. That is the nature of this report, though. Look for 30-50 ticks on the spike, and 40-60 ticks on the reversal. If the initial spike pops for only 15-20 ticks, get out there if possible, because a reversal is likely forthcoming. Does not routinely abide by the laws of supply and demand.

It is also a safe play to wait out the initial reaction to check the results and enter a manual trade 2-5 min after the report breaks. Paper trade this if you have not traded this report before.
