Last 6 Reports:	3 : SPK/REV	2 : 2ND PK	0 : DULL	1 : INDECISIVE	
Recommended BracketDistance setting:			7-10		

**New report for JOBB that is somewhat unique. This is not found on Forex Factory. It is a monthly USDA report on agricultural commodities. It affects many different products, but Corn (ZC) is the most affected and most liquid. This has a chance to release up to about 30 sec early (2 early releases before 8:30:00 in the last 6 months), so set your bracket to launch at xx:29:25. It has the potential to seek a 2nd peak, but only a 33% chance. The 1st peak often takes more than 1 candle to hit its max. Reversal usually exceeds the peak. Look for 30-80 ticks on the spike, 10-30 additional ticks on a potential 2nd peak, and 40-90 ticks on the reversal.

Note: If you have not opened a ZC chart before, you will have to set it up correctly. Open the Data series window on your chart and change the "session template" to "Default 24/7". Then hit okay. If you do not execute this step, your chart will not scroll.
