Smaller moving Canadian report. Last month was indecisive due to the results matching the forecast. Good for 10-20 ticks on an average break with a small chance of a bigger 2nd peak of 20-40 ticks as the follow on reaction pans out slowly and deliberately. Look for 15-25 ticks on the reversal. We had one dull report in Sep '12 when the reading came in at 0%, the razor line between deflation and inflation.
