Newer report for JOBB. The Jan and Mar reports were both indecisive making it a level 3 risk, but the remaining 10 reports we have catalogued were safe, including the last 2 months seeing the largest yields in a year. This is a medium moving report and often peaks after the first bar. Look for 15-25 ticks on the spike, 20-40 ticks on a very likely 2nd peak in 16-43 min, and 20-45 on the reversal in 15-120 min. This breaks 2 hours into the European trading session, so the volume on the 6E will be fairly high.
