| Recommended BracketDistance setting: | | | 10 | 20 Tick Stop |

Trade with caution and ensure you understand the risk. THIS IS THE RISKIEST REPORT FOR JOBB. Occasionally prone to opposite direction spike 1-2 sec before report is released. USE of JOBB is highly risky due to the potential of the order filling in the wrong direction.

We are recommending a new approach to this report after a successful trial period in the last 4 months. This report offers large profit potential, but often has a premature spike and high slippage. **Set your bracket entry time 1 min early (xx:28:57).** If you get a premature spike, then look to exit and take the profit. If you do not get a filled on the :30 bar, leave the order to wait to fill on the :31 bar for the normal move.

This report is similar to the CL inventory, but it is prone to a decisive direction after the report release and about 15-25 ticks of slippage. Look for 20-40 ticks net on the spike after slippage, and a reversal that often exceeds the spike. If the offset between the result and the forecast is less than 10, trading the reversal is a safe proposition. If the results are matching or nearly matching, trap trading the breakouts is a good play.

| Recommended BracketDistance setting: | | 2 | 3 Tick Stop | |

Be sure to select "Strategy Internal" mode in the JOBB settings to ensure your stop loss is not rejected on the ZB.

New report for JOBB. Set your activation time for xx:01:20 as the spike will happen a little over 1 min late. Use a 3 tick stop loss. Expect to be filled with 0-2 ticks of slippage, then look for 4-8 ticks on the spike and a point of support or resistance in that area. Though this is the 7-y Auction, it has caused a reaction on the ZB for May and June due to the heightened attention on the bonds, but last month was dull. Before that it has been consistently dull. If you are not filled by 45 sec into the bar, cancel the order. If you see it hover around your fill point for more than 2 min, exit near breakeven as it is likely a dull reaction. While the 10-y and 30-y auctions are on Forex Factory, the 7-y is not. Limited data sample, so no modeling for a 2nd peak. The reversal has been nearly double the spike and takes much longer to pan out.
