January and March were indecisive in 2013, but since March, only September was indecisive, so we are returning this to a Risk 2. If the result is nearly matching, it will only yield about 10 ticks gross, so keep that in mind when you are looking to exit and comprehend the results. This is a medium moving report and occasionally peaks after the first bar. It also occasionally releases several seconds late. Look for 8-15 ticks on the spike, 20-40 ticks on a potential 2nd peak in 16-43 min, and 20-45 on the reversal in 15-100 min. This breaks 2 hours into the European trading session, so the volume on the 6E will be fairly high.
