

HIGH IMPACT REPORT ALERT:

Thursday, 3/6/14

Unemployment Claims - Trap Trade		RISK: 1	6J 03-14	
8:30 am Eastern / 5:30 am Pacific		Forecast: 336K		
Avg 1st Peak: 14 ticks (0:01-0:22 sec)	Min: 8 ticks (11/21/13)	Max: 21 ticks (12/5/13)		
Avg Reversal: 13 ticks (0:11 - 3:30 after report)	Min: 8 ticks (11/21/13)	Max: 26 ticks (12/12/13)		
Last 12 Reports:	8 : SPK/REV	4 : DULL (no fill)	0 : DULL (fill)	0 : STOPPED
Recommended settings:		Tier 1: 8-10 ticks	Tier 2: 18-20 ticks	10 Tick Stop

Look for the first peak to be reached in 1-22 sec after the release, then the reversal to materialize between 11 sec on the :31 bar up to about 4-5 min. Of the reactions that would have breached the Trap tiers, we have had 5 reports yield 8-12 ticks and 3 reports yield 19-21 ticks since inception, so use a 2 tier approach with 1 trap at about 8-10 ticks offset and the outer tier at 18-20 ticks offset. Try to optimize the location of the tier to be just outside of a Pivot, SMA, or HOD/LOD/OOD. **If you are not filled in the first 20 sec, cancel the order.** No other significant report will be released with this report.

Factory Orders (ORANGE REPORT)		RISK: 2	6J 03-14
10:00 am Eastern / 7:00 am Pacific		Forecast: -0.4%	
Recommended BracketDistance setting:		3	5 Tick Stop

A small mover, but influential and reliable orange report for about 4-10 ticks on average. This report is often paired up with ISM Non-Manufacturing PMI and has substantial overlap in the data. Since the ISM report was bearish on Wednesday, that may foreshadow the same for this report. This report is not influential enough to move the ZB, so we will use the 6J. Look for 4-10 ticks, and if it hovers and reverses after about 20 sec, be sure to exit near break even.

HIGH IMPACT REPORT ALERT:

Thursday, 3/6/14

Natural Gas Storage (Yellow Report)		RISK: 5	NG 04-14	
10:30 am Eastern / 7:30 am Pacific		Forecast: -134B FT³		
Avg 1st Peak: 64 ticks (1-2 min after report)	Min: 13 ticks (11/7/13)	Max: 170 ticks (5/2/13)		
Avg 2nd Peak: 108 ticks (4-20 min after rpt)	Min: 23 ticks (11/7/13)	Max: 257 ticks (6/14/12)		
Avg Reversal: 63 ticks (11-40 min after Pk)	Min: 16 ticks (3/8/12)	Max: 155 ticks (8/16/12)		
Last 10 Reports:	3 : SPK/REV	3 : 2ND PK	0 : DULL	4 : INDECISIVE
Last 25 Reports:	10 : SPK/REV	6 : 2ND PK	0 : DULL	9 : INDECISIVE
Recommended BracketDistance setting:			10	20 Tick Stop

Trade with caution and ensure you understand the risk. THIS IS THE RISKIEST REPORT FOR JOBB. Occasionally prone to opposite direction spike 1-2 sec before report is released. USE of JOBB is highly risky due to the potential of the order filling in the wrong direction and extremely high slippage.

We are recommending a new approach to this report after a successful trial period in the last 4 months. This report offers large profit potential, but often has a premature spike and high slippage. **Set your bracket entry time 1 min early (xx:28:57).** If you get a premature spike, then look to exit and take the profit (or a small loss). If you do not get a filled on the :30 bar, leave the order to wait to fill on the :31 bar for the normal move.

This report is similar to the CL inventory, but it is prone to a decisive direction after the report release and about 15-30 ticks of slippage. Look for 20-40 ticks net on the spike after slippage, and a reversal that often exceeds the spike. If the offset between the result and the forecast is less than 10, trading the reversal is a safe proposition. If the results are matching or nearly matching, trap trading the breakouts is a good play.
