

HIGH IMPACT REPORT ALERT:

Friday, 3/14/14

Prelim UoM Consumer Sentiment - Trap Trade	RISK: 2	6J 03-14	
9:55 am Eastern / 6:55 am Pacific	Forecast: 81.9		
Recommended settings:	Tier 1: ~8 ticks	Tier 2: ~15 ticks	10 Tick Stop

Newer report for JOBB for the Trap Trade approach. Please take note of the bizarre release time. Look for the first peak to be reached by 8 sec after the release, then the reversal to materialize within 4 min. We have had 5 reports yield 8-12 ticks and 2 reports yield 16 and 23 ticks since the summer, so use a 2 tier approach with 1 trap at about 8 ticks offset and the outer tier at 15 ticks offset. Try to optimize the location of the tier to be just outside of a Pivot, SMA, or HOD/LOD/OOD. **If you are not filled in the first 20 sec, cancel the order.**
