

HIGH IMPACT REPORT ALERT:

Thursday, 6/19/14

Unemployment Claims - Trap Trade		RISK: 1	6J 09-14	
8:30 am Eastern / 5:30 am Pacific		Forecast: 316K		
Avg 1st Peak: 14 ticks (0:01-0:22 sec)	Min: 8 ticks (11/21/13)	Max: 21 ticks (12/5/13)		
Avg Reversal: 13 ticks (0:11 - 3:30 after report)	Min: 8 ticks (11/21/13)	Max: 26 ticks (12/12/13)		
Last 12 Reports:	6 : SPK/REV	6 : DULL (no fill)	0 : DULL (fill)	0 : STOPPED
Recommended settings:		Tier 1: 10-12 ticks	Tier 2: 18-20 ticks	10 Tick Stop

Look for the first peak to be reached in 1-22 sec after the release, then the reversal to materialize between 11 sec on the :31 bar up to about 4-5 min. Of the reactions that would have breached the Trap tiers, we have had 5 reports yield 8-12 ticks and 9 reports yield 19-21 ticks since inception, so use a 2 tier approach with 1 trap at about 10-12 ticks offset and the outer tier at 18-20 ticks offset. Try to optimize the location of the tier to be just outside of a Pivot, SMA, or HOD/LOD/OOD. **If you are not filled in the first 20 sec, cancel the order.** No other report will be released at the same time.

Philly FED Manufacturing Index		RISK: 2	6J 09-14
10:00 am Eastern / 7:00 am Pacific		Forecast: 14.3	
Recommended BracketDistance setting:		3	7 Tick Stop

A medium mover, but influential and reliable report that we are shifting back to the 6J for the 3rd month. April yielded 11 ticks that reversed very quickly due to market dynamics and May was dull with no fill on a near matching report. Look for 4-10 ticks net on the spike. If it hovers for more than 6-8 sec, be sure to secure your profit as a reversal is likely. Look for about 10-15 ticks on a reversal and another 5-8 ticks on an occasional 2nd peak.

HIGH IMPACT REPORT ALERT:

Thursday, 6/19/14

Natural Gas Storage (Yellow Report)		RISK: 5	NG 07-14	
10:30 am Eastern / 7:30 am Pacific		Forecast: 116B FT³		
Avg 1st Peak: 64 ticks (1-2 min after report)	Min: 13 ticks (11/7/13)	Max: 170 ticks (5/2/13)		
Avg 2nd Peak: 108 ticks (4-20 min after rpt)	Min: 23 ticks (11/7/13)	Max: 257 ticks (6/14/12)		
Avg Reversal: 63 ticks (11-40 min after Pk)	Min: 16 ticks (3/8/12)	Max: 155 ticks (8/16/12)		
Last 10 Reports:	3 : SPK/REV	3 : 2ND PK	0 : DULL	4 : INDECISIVE
Last 25 Reports:	10 : SPK/REV	7 : 2ND PK	0 : DULL	8 : INDECISIVE
Recommended BracketDistance setting:			10	20 Tick Stop

Trade with caution and ensure you understand the risk. THIS IS THE RISKIEST REPORT FOR JOBB. Occasionally prone to opposite direction spike 1-2 sec before report is released and slippage up to 30+ ticks (40-50 ticks on moves that gross over 100 ticks). USE of JOBB is highly risky due to the potential of the order filling in the wrong direction.

Set your bracket entry time only 1 second early (xx:29:59) and ensure a good clock synch. A profit target of 20 ticks or less is safer, while also using a breakeven to move the stop to a more favorable position. This report is similar to the CL inventory, but it is prone to a decisive direction after the report release and about 15-30 ticks of slippage. Look for 20-40 ticks net on the spike after slippage, and a reversal that often exceeds the spike. If the offset between the result and the forecast is less than 10, trading the reversal is a safe proposition. If the results are matching or nearly matching, buying the dips and selling the tops is a good play.

Another reliable approach is to look for a reversal entry late in the :33 bar and look for 15-20 ticks. As long as there is a stable spike on the :31 bar, this is successful about 2/3 of the time with a stop of about 10 ticks.
