

## HIGH IMPACT REPORT ALERT:

Wednesday, 6/25/14

<b>(Core) Durable Goods Orders - Trap Trade</b>		<b>RISK: 2</b>	<b>6J 09-14</b>
<b>8:30 am Eastern / 5:30 am Pacific</b>		<b>Forecast: 0.3% (Core) / -0.1% (Reg)</b>	
<b>Recommended settings:</b>	<b>Tier 1: 10-12 ticks</b>	<b>Tier 2: 18-20 ticks</b>	<b>12 Tick Stop</b>

\*For the Trap Trade an activation time of about 1 min to 45 sec before the news release is recommended to allow time to reposition the orders to adhere to a nearby area of support/resistance. **If you are not filled in the first 20 sec, cancel the order.**

After several reports were indecisive since the Spring of 2013, we shifted this report to the Trap Trade after the new year. It often sees matching results, a reading of 0.0%, or conflicting results on the core and regular readings that causes a whipsaw or a sharp pullback. This report is a smaller mover with the typical range of the initial spike being 10-16 ticks (8 of last 12 reactions). It has also had 4 reactions of 18 - 25 ticks. Look for the reversal to either be quick within 1-8 min or take up to 20 min and return to the area of the origin.

**Trade with caution and ensure you understand the risk. Use a 10 tick buffer for this trade to avoid a premature fill in the wrong direction. This report is 3-pronged (Crude oil, Gasoline, and Distillates - Heating Oil)**

Now as we are in the summer months, we have seen a transition where the Distillate reading will fall off the radar making the report more stable and safe. Quick and large reversals are common, so I recommend using a breakeven and profit target. Be sure and exit if you see the price action hovering for more than 5 sec as it will likely reverse strongly. Look for 10-20 ticks net on the spike, and 40-60 ticks on the reversal. If the initial spike pops for only a few ticks beyond your fill point and hovers, get out there if possible, because a reversal is likely forthcoming. Does not routinely abide by the laws of supply and demand.

It is also a safe play to wait out the initial reaction to check the results and enter a manual trade after a reversal about 3 min after the report breaks or use a Trap Trade with an offset of 20-25 ticks and look for a quick exit with around 5-10 ticks. Also look for trend lines on the swings to use for favorable entries. Paper trade this if you have not traded this report before.
