This is one of our safest and most profitable trap trades. I recommend using a two tier Trap Trade approach to trade the breakouts with a 10 tick stop loss. This is the detailed results that follow the RBA rate statement from 2 weeks ago. The Minutes often reflect a similar reaction to the cash rate, but are not bound by that. In this case since the Cash Rate resulted in a slow but decisive long reaction, so if the initial reaction is short, look for the reversal to be bigger and sustained. If the initial reaction is long, look for a smaller reversal and exit more quickly.
