

HIGH IMPACT REPORT ALERT:

Thursday, 10/16/14

Unemployment Claims - Trap Trade			RISK: 1	6J 12-14	
8:30 am Eastern / 5:30 am Pacific		Forecast: 286K			
Avg 1st Peak: 14 ticks (0:01-0:22 sec)	Min: 8 ticks (11/21/13)		Max: 21 ticks (12/5/13)		
Avg Reversal: 13 ticks (0:11 - 3:30 after report)	Min: 8 ticks (11/21/13)		Max: 26 ticks (12/12/13)		
Last 12 Reports:	5 : Tier 1	1: Tier 2	6 : DULL (no fill)	0 : DULL (fill)	0 : STOPPED
Recommended settings:		Tier 1: 8-10 ticks	Tier 2: 18-20 ticks	10 Tick Stop	

Look for the first peak to be reached in 1-22 sec after the release, then the reversal to materialize between 11 sec on the :31 bar up to about 4-5 min. Of the reactions that would have breached the Trap tiers, we have had several reports yield 8-12 ticks and a few other reports yield 19-21 ticks since inception, so use a 2 tier approach with 1 trap at about 8-10 ticks offset and the outer tier at 18-20 ticks offset. Try to optimize the location of the tier to be just outside of a Pivot, SMA, or HOD/LOD/OOD. **If you are not filled in the first 20 sec, cancel the order or if it falls short of a tier and hovers it is also safe to manually move the order closer for an entry.** No other statistical reports will be release with this.

Philly FED Manufacturing Index			RISK: 2	6J 12-14
10:00 am Eastern / 7:00 am Pacific		Forecast: 19.9		
Recommended BracketDistance setting:			3	7 Tick Stop

A medium mover, but influential and reliable report that we are shifting back to the 6J for the 5th month. April and July yielded 11 ticks that reversed very quickly due to market dynamics but May and June were both dull with no fill on near matching results. Look for 4-10 ticks net on the spike. If it hovers for more than 6-8 sec, be sure to secure your profit as a reversal is likely. Look for about 10-15 ticks on a reversal and another 5-8 ticks on an occasional 2nd peak.

HIGH IMPACT REPORT ALERT:

Thursday, 10/16/14

Natural Gas Storage (Yellow Report)		RISK: 5	NG 11-14	
10:30 am Eastern / 7:30 am Pacific		Forecast: 91B FT³		
Avg 1st Peak: 64 ticks (1-2 min after report)	Min: 13 ticks (11/7/13)	Max: 170 ticks (5/2/13)		
Avg 2nd Peak: 108 ticks (4-20 min after rpt)	Min: 23 ticks (11/7/13)	Max: 257 ticks (6/14/12)		
Avg Reversal: 63 ticks (11-40 min after Pk)	Min: 16 ticks (3/8/12)	Max: 155 ticks (8/16/12)		
Last 10 Reports:	3 : SPK/REV	4 : 2ND PK	0 : DULL	3 : INDECISIVE
Last 25 Reports:	10 : SPK/REV	7 : 2ND PK	0 : DULL	8 : INDECISIVE
Recommended BracketDistance setting:			10	20 Tick Stop

Trade with caution and ensure you understand the risk. THIS IS THE RISKIEST REPORT FOR JOBB. Occasionally prone to opposite direction spike 1-2 sec before report is released and slippage up to 30+ ticks (40-50 ticks on moves that gross over 100 ticks). USE of JOBB is highly risky due to the potential of the order filling in the wrong direction.

Set your bracket entry time only 1 second early (xx:29:59) and ensure a good clock synch. A profit target of 20 ticks or less is safer, while also using a breakeven to move the stop to a more favorable position. This report is similar to the CL inventory, but it is prone to a decisive direction after the report release and about 15-30 ticks of slippage. Look for 20-40 ticks net on the spike after slippage, and a reversal that often exceeds the spike. If the offset between the result and the forecast is less than 10, trading the reversal is a safe proposition. If the results are matching or nearly matching, buying the dips and selling the tops is a good play.

Another reliable approach is to look for a reversal entry late in the :33 bar and look for 15-20 ticks. As long as there is a stable spike on the :31 bar, this is successful about 2/3 of the time with a stop of about 10 ticks.

HIGH IMPACT REPORT ALERT:

Thursday, 10/16/14

Crude Oil Inventory			RISK: 3	CL 11-14
11:00 am Eastern / 8:00 am Pacific		Forecast(C/G/D): 2.78M/ -1.20M/ -1.52M		
Avg 1st Peak: 34 ticks (1-3 min after report)	Min: 11 ticks (3/27/13)		Max: 93 ticks (4/4/12)	
Avg 2nd Peak: 75 ticks (5-40 min after report)	Min: 25 ticks (10/11/12)		Max: 191 ticks (9/18/13)	
Avg Reversal: 65 ticks (17-44 min after Pk)	Min: 17 ticks (8/21/13)		Max: 211 ticks (5/15/13)	
Last 10 Reports:	2 : SPK/REV	5 : 2ND PK	2 : DULL	1 : INDECISIVE
Last 25 Reports:	7 : SPK/REV	14 : 2ND PK	1 : DULL	3 : INDECISIVE
Recommended BracketDistance setting:			10	15 Tick Stop

Trade with caution and ensure you understand the risk. Use a 10 tick buffer for this trade to avoid a premature fill in the wrong direction. This report is 3-pronged (Crude oil, Gasoline, and Distillates - Heating Oil)

Now as we are in the still in the summer months (before the weather changes), we have seen a transition where the Distillate reading will fall off the radar making the report more stable and safe. Quick and large reversals are common, so I recommend using a breakeven and profit target. Be sure and exit if you see the price action hovering for more than 5 sec as it will likely reverse strongly. Look for 10-20 ticks net on the spike, and 40-60 ticks on the reversal. If the initial spike pops for only a few ticks beyond your fill point and hovers, get out there if possible, because a reversal is likely forthcoming. Does not routinely abide by the laws of supply and demand.

It is also a safe play to wait out the initial reaction to check the results and enter a manual trade after a reversal about 3 min after the report breaks or use a Trap Trade with an offset of 20-25 ticks and look for a quick exit with around 5-10 ticks. Also look for trend lines on the swings to use for favorable entries. Paper trade this if you have not traded this report before.
