

Jay's Rules & Warnings:

1. Do not trade any report on the "DO NOT TRADE LIST". Sure there are rare occasions where you can profit off of one of these, but the risk far exceeds the potential for profit.
2. Do not trade any report breaking on a Sunday or on a Holiday in the US. The low trade volume makes the reaction dull and erratic. This includes December after the first week through the first week of January and the week of Thanksgiving.
3. Do not trade reports breaking at the same time as Weekly Unemployment Claims. I may make an exception for Retail Sales and Durable Goods as they are top tier, but no others.
4. Do not trade any bottom tier or medium mover reports breaking at the same time. This often leads to a tug of war for direction and will hit you with a loss.
5. For the top tier and the medium movers, if your JOBB order does not fill after 8–10 sec from the new candle origin, close out. A dull reaction is likely in the works. On a bottom tier report, this can be normal.
6. Always use a stop loss when trading the Reversal!
7. Always disable JOBB strategy after using it to trade a report.
8. Ensure you are using the same chart for the exit of the trade as the settings for JOBB dictate (index, month, sim vs live account)

Jay's Rules & Warnings:

US Reports:

Top Tier (> 50 ticks Avg)	Non-Farm Employment, ISM Manufacturing PMI, Retail Sales, Durable Goods, FOMC Statement, Advance GDP, Beige Book
Medium Movers (30 - 50 ticks Avg)	Philly Fed Manufacturing, Oil Inventory, CB Consumer Confidence, Prelim GDP
Bottom Tier (15-25 ticks Avg)	ADP Non-Farm Employment, Building Permits, Trade Balance, Industrial Production
Wildcards	FED Chairman Speaks, FED Chairman Testifies

AUS Reports:

Top Tier (> 50 ticks Avg)	Employment Change, CPI, GDP
Medium Movers (30 - 50 ticks Avg)	RBA Rate Statement, Retail Sales, Monetary Policy Meeting Minutes
Bottom Tier (15-25 ticks Avg)	Trade Balance, RBA Monetary Policy Statement
